LUKE McLUKE SAYS.

It is none of your business when a man's hose supporters break. But it is everybody's business if it happens to be a girl.

Before marriage he sighs because he can't get her. After marriage he sighs because he can't get rid of her.

When Father was courting Mother he used to stick around until the milkman came. That's the reason why Mother tells Daughter that no gentleman will stay later than 10 o'clock when he calls on a girl.

Practice may make perfect in other things, but it doesn't seem to improve the marksmanship of tobacco chewers.

Diamonds and wine and limousines may be luxuries. But don't forget that a five-cent sandwich is also a luxury if you only have four cents.

BARROW'S BODY RECOVERED.

After a search of twelve days the body of David Barrow, Jr., of Lexington, who was drowned in Lake Michigan, near Ludington, Mich., was found Sunday morning by the life savers' patrol, about five miles from the point at which he lost his life.

The body was taken to the station and viewed by the authorities and identified by Dr. Woolfolk Barrow, of Lexington, beyond all doubt by means of a scar from an operation for appendicitis, and one on the forehead from a skating accident.

Dr. Woolfolk Barrow left yesterday for Lexington with the body.

SUNBURN AND TAN.

One who comes back from a summer vacation without what is commonly called a good health tan is regarded as not having taken full advantage of his opportunities. Most people feel that in getting themselves well tanned they have done something meritorious, something that, in an obscure way, is beneficial to their health and well-being. So strong is the superstition that people will sometimes voutarily submit their arms and faces to painful sunburn, and rejoice in the subsequent mahoganying of their skin. As a matter of fact, there is no special virtue in a coat of tan. It is the protection that

unaided nature attempts to supply to the skin when it is attacked by the damaging ultra-violet rays. It filters the sunlight, and it that way weakens or eliminates the force of the rays. There is no reason for compelling nature to take these preventive measures. A sun hat of light brown or green will perform the same service more efficiently.

The ultra violet rays have the merit of destroying germs; but few persons it may be believed, feel it necessary to acquire a coat of tan for that purpose.

In hot weather, it is well known, the color of clothes is important. Certain clothes heighten discomfort; others greatly reduce it. Anyone freely

exposed in very hot weather to the red rays, is apt to suffer from over-excited nerves; in fact, to these rays most cases of sunstroke may be attributed. Red clothing offers them free passage, and is therefore not desirable. Blue is also undesirable, for it offers no protection against the ultra-violet rays. Green is of all colors the coolest and most restful. The most comfortable rooms in hot weather are those decorated in green. They have the further advantage of being, for some reason, especially unattractive to the house fly.—Youth's Companion.
